

PROJECTS

Task Manager

03/2026 - 04/2026

Next.js, TailwindCSS, Node.js, Express.js, MongoDB

- Delivered a full stack task management application to over 250 users by developing task creation and assignment features.
- Secured the application with JWT authentication and HTTP-only cookies for token storage, protecting against token theft via client-side scripts.
- Implemented role-based update rules: creators can edit all fields, assignees can update only status, and assigners can update only due date.
- Enforced RBAC on protected routes, so users view only relevant tasks; restricted task deletion to the original creator.

LLM-Driven Conversational Platform (DeepSeek Clone)

04/2026 - 06/2026

Next.js, TailwindCSS, Grok API, Node.js, JWT, Express.js, MySQL, Prisma

- Enhanced user experience by lowering chat latency by 40% via Groq API integration
- Architected a production-style Node.js backend API layer handling concurrent users with predictable response times
- Designed a MySQL schema with 3+ tables and optimized queries for fast conversation history retrieval
- Used Prisma ORM for type-safe database operations, reducing runtime errors

E-Commerce Storefront Developer

Shoe Center

01/2026 - 02/2026

Next.js, TailwindCSS

- Achieved a 90+ Lighthouse performance score by developing an optimized, responsive e-commerce UI using Next.js and Tailwind CSS
- Developed a fully responsive, mobile-first e-commerce storefront with product listing, filtering and product detail pages
- Implemented Server-Side Rendering (SSR) and Static Site Generation (SSG) for product pages, improving page load speed and SEO performance
- Deployed on Vercel with continuous deployment (CI/CD) through GitHub

Custom Knowledge-Based Assistant

08/2026 - 09/2026

React.js, TailwindCSS, Node.js, Express.js

- Developed a full-stack **rule-based conversational assistant** using React.js, Node.js, and Express.js.
- Optimized React frontend bundle size, reducing initial load time and Time-to-Interactive to under 1.5 seconds.
- Designed an efficient MongoDB schema using Mongoose to improve knowledge retrieval.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure sensitive user data and chat history.

Portfolio Website

07/2026 - 08/2026

Next.js, TailwindCSS

- Developed a full-stack developer portfolio using **Next.js, React.js, and Tailwind CSS** to showcase projects, technical skills, and professional experience.
- Built a responsive and modern UI with reusable React components and **Next.js App Router**.
- Integrated project demonstrations, GitHub repositories, live deployment links, resume access, and contact functionality.
- Optimized frontend structure and rendering to improve **page performance, responsiveness, and user experience**.
- Designed a scalable component-based architecture using **React and Next.js** for easier maintenance and future enhancements.
